

# LYNDEN ONLINE

*Tradition + Pride + Excellence*

Hello Option 3 - Lynden Online students and families!

I am amazed at the work that is taking place this week to prepare for our launch Tuesday, the 8th. Teachers are working hard to get Canvas courses up and running, registrars are busy putting students into classes, and all are being trained on how to best serve students and families in a completely new environment. Middle school students will all be assigned one teacher for their math and science courses and a second teacher for their language arts and social studies. All students are placed in an elective class rotation of project-based activities and extensions to enrich their online learning experience. If you are receiving this email, no further registration is required. You will receive an email Friday with instructions on how to login and access your courses!

We are excited to be able to offer a completely online option for students and families and know how important it is for families to have the perfect combination of flexibility and support. I'm confident that our end product will be a rigorous and enriching online learning environment for students to thrive in. Things are coming together fast, but we still have work to do. Please be patient with us as we work out all the bugs.

**Canvas:** Canvas is the online learning platform that students and parents will use to access all class content. More details and training for students and parents to come.

**Laptops:** All Option 3 - Lynden Online Students will be included in their school of origin's laptop distribution. Watch for an email from your building principal with pick-up days and times.

If you have questions or concerns, please reach out to me or our knowledgeable support team.

**For last names:**
